

Looking for National Drinking Water Clearinghouse products?

For the last five years, we've printed a list of our products in *On Tap*. Like many other organizations, though, we've had to cut costs. So, we won't be running the product list here anymore.

Rest assured we still have hundreds of free and low-cost products. You may peruse these items on our Web site at www.ndwc.wvu.edu.

If you don't have Internet access or you'd like to discuss your particular situation, please call us toll free at (800) 624-8301 and select option "3" to talk with one of our technical assistance specialists.
